## Summary

As a young lady in early 20s, I have committed myself to family commitments and education priorities. With covid-19 since 2020 to current year, I have made progress in completing two 100 level courses in 2020, and 2021 with challenge of financial constraints I have spent most times looking after my parents. It is my passion in pursuing the dream I long to have with at least having a working experience. I am hardworking and always put in effort to pursue tasks given.
